

Assignment: 2

Task: 3

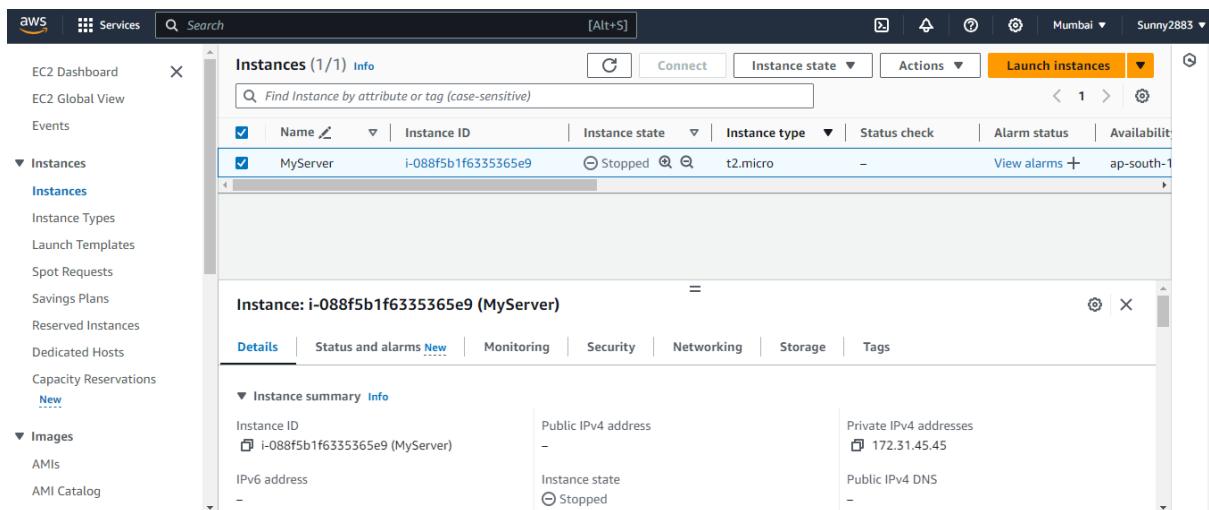

Modify Instance Type:

Make it from t2.micro to t2.small or t2.nano.

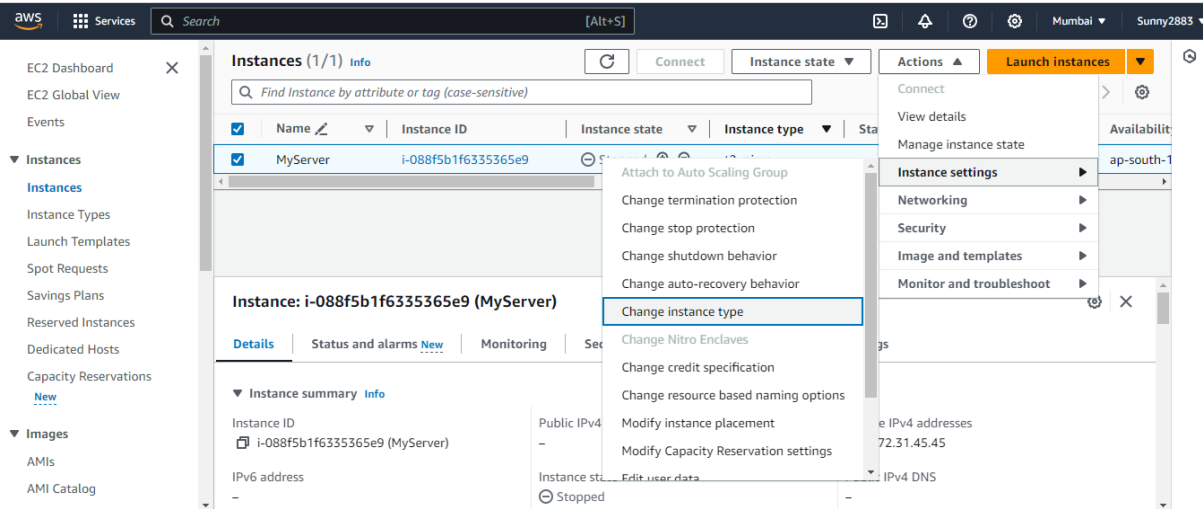

Step:1 Navigate to EC2 dashboard:

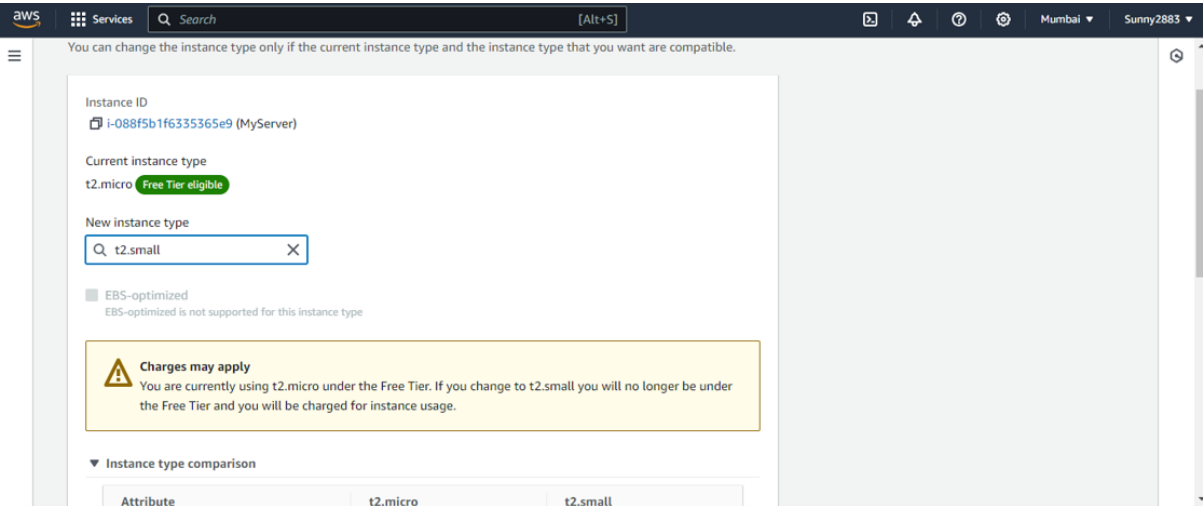

Step2: Select the instance and stop the running instance before changing the instance type.

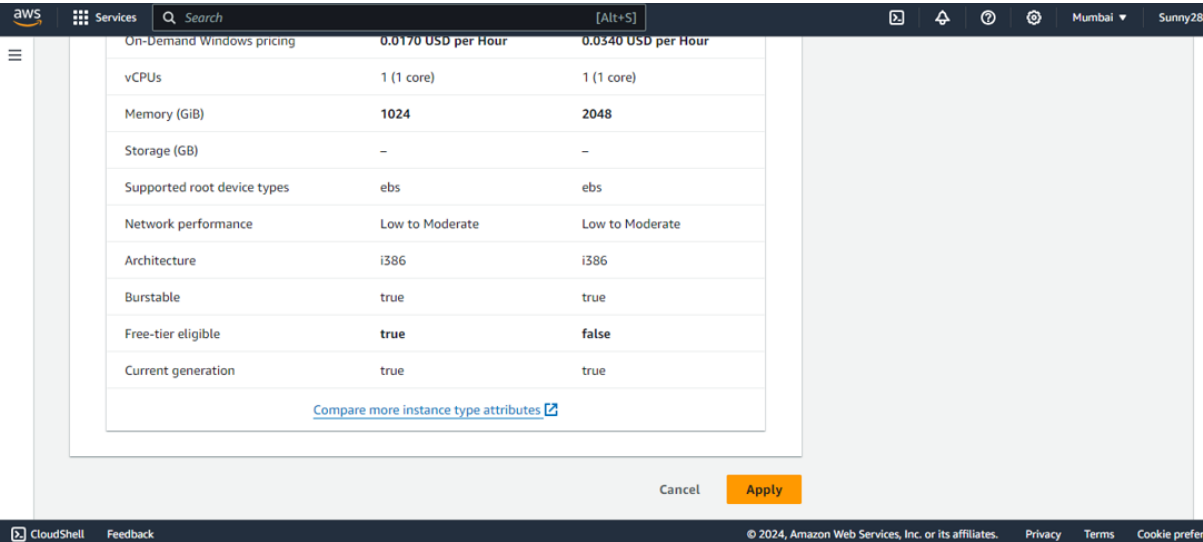

Step3: Click on Action and go to instance setting and select change instance type.

Step4: Modify the instance to t2micro to change t2small.

Step5: Apply the changes.

Step6: Instance type changes successfully t2micro to t2small.
